ASP.NET MVC  
REACT  
NODEJS  
EXPRESS  
SQL  
JQUERY

## EXPERIENCE

---

### REAL-ESTATE MANAGEMENT WEB APPLICATION

This is full stack web site created using ASP.NET MVC. It includes authentication and has three user roles and email verification. It is full CRUD application, also users can browse the selling properties and it allows clients to chat with agents.

<https://github.com/Lungan77/Real-Estate-Asp.net-mvc.git>

### MOVIE BOOKING WEB APPLICATION

This a full-stack application created using Asp.Net MVC. It includes authentication and has two user roles. It verifies user email and users can recover forgotten password. Users can search for movies, watch movie trailer, select a date, book and make online payment.
